

GREENGRILL CERAMIC

THE CADAC GREENGRILL SYSTEM

Zero pollution. Zero contaminants. Maximum hygiene. The new CADAC ceramic-coated “GreenGrill” is the first on the market. The aluminium is specially pre treated, then coated with ceramic non-stick coatings, and baked at 400°C. The ceramic coating is made from organic materials, so it is entirely free of PFOA's which pollute the atmosphere. Ceramic coatings do not release harmful gases when cooking. The CADAC GreenGrill is more durable and harder than a normal “non-stick” PTFE surface, and is easily cleaned by washing with soap, warm water and a sponge. With CADAC GreenGrill Ceramic there is no need for scraping with wire brushes.

- Environmentally friendly
- Healthier cooking
- Durable
- Easy Clean
- Maximum hygiene

EASY ASSEMBLY

THE CADAC EASY ASSEMBLY

CADAC BBQs are very easy to assemble and our patio grills can be assembled within 30 minutes. CADAC portable barbecues are also very easy to put together and can be ready to use within minutes. There is no need for any special tools for camping barbecues with CADAC Easy Assembly so you will have plenty of time to enjoy the Braai Life!

THE BIG 5 INNOVATION BY CADAC
